RECENZIJA

Registar za rak Centralne Srbije predstavlja najznačajniji izvor podataka o obolevaju i umiranju od malignih bolesti u našoj zemlji. Dizajniran po tipu populacionog registra, pruža relevantne informacije o incidenciji i mortalitetu od raka u Srbiji njihovim trendovima. Ovi parametri su od krucijalnog značaja ne samo za praćenje epidemiološke situacije kada su u pitanju maligne bolesti, već i za evaluaciju različitih mera i programa koji se sprovode u cilju njihove prevencije i smanjenja bremena ovih bolesti u našoj populaciji, kao što je npr. implementacija skrininga za određene maligne bolesti.

Imajući u vidu obiman set podataka koji se odnose na prirodu bolesti, kao i respektabilne parametre kvaliteta ovih podataka, Registar za rak u našoj zemlji predstavlja izuzetno značajan resurs za praktični rad lekara, edukaciju i istraživanja. Podaci ovog Registra služe lekarima različitih specijalnosti da prošire svoja znanja o malignim bolestima, faktorima rizika za njihov nastanak i faktorima prognoze, u cilju što ranijeg otkrivanja i izbora najoptimalnijeg načina lečenja.

Podaci Registra za rak Centralne Srbije se takođe, koriste u svim vidovima nastave epidemiologije, onkologije i drugih oblasti koje se tiču malignih bolesti, na medicinskim fakultetima u zemlji, počev od osnovnih studija, preko specijalistickih i subspecijalistickih, do doktorskih studija. Zahvaljujući tome, značajno je porasla upotreba vrednost podataka Registra koji sve više postaje i ozbiljan resurs za različite vrste epidemioloških i drugih istraživanja, što je dokumentovano u velikom broju raznovrsnih publikacija, uključujući i doktorske teze.

Beograd, 30.10.2013. godine

Medicinski fakultet Univerzitet u Beogradu

Prof. dr Tatjana Pekmezović

Populacioni register za rak je najstariji register u Srbiji i ima neprocenjiv značaj za sagledavanje opterećenosti društva malignim bolestima, planiranje strategije za prevenciju i kontrolu raka, praćenje uspešnosti skrininga i drugih preventivnih programa, planiranje i organizaciju zdravstvene zaštite, kao i za izvođenje epidemioloških i kliničkih istraživanja. Od 1998. godine Register za rak je primljen u Internacionalnu (IACR) i Evropsku asocijaciju registara za rak (ENCR), što je doprinelo afirmaciji Srbije, kao zemlje koja ide u korak sa visokorazvijenim zemljama.

Poseban akcenat treba staviti na kvalitet Registra, koji je rezultat decentralizovanog načina prikupljanja podataka (na nivou okruga), aktivnog i pasivnog nadzora, korišćenja više izvora informacija o obolelima i umrliма od raka, adekvatne informatičke podrške, unapređenja znanja zdravstvenih radnika i primene metodologije međunarodnih asocijacija (IARC i ENCR).

Autori su na originalan i sistematizovan način prikazali podatke o obolevanju i umiranju od raka. Retko se sreće da se „suvoparni” statistički podaci prezentuju na ovako zanimljiv, izuzetno jasan i prijemčiv način, čineći ovu publikaciju korisnom ne samo stručnjacima preventivnih grana medicine, nego i kliničarima i nemedicinarima. Osim toga, uspešno je pronađena mera ukupnog obima informacija sa preciznim formulacijama prihvatljivim za široku javnost.

Ukupno uvezši ova publikacija zaslužuje pohvale ne samo sa aspekta kvaliteta prezentovanog materijala, već, možda čak i više, sa aspekta utemeljivanja neophodnosti kontinuiranog praćenja kretanja obolevanja i umiranja od malignih bolesti.

Neophodno je da Ministarstvo zdravlja Republike Srbije prepozna značaj ovog populacionog registra i da podrži sve aktivnosti koje mogu da doprinesu daljem njegovom unapređenju, što bi uticalo na poboljšanje zdravstvene politike i menadžmenta, a samim tim i na smanjenje broja obolelih i umrlih od raka, produženje životnog veka obolelih, poboljšanje kvaliteta njihovog života i do redukcije ili eliminacije potencijalnih faktora rizika.

Prof. dr Sandra Šipetić-Grujičić

Registar za rak u centralnoj Srbiji autorske grupe Odeljenja za prevenciju i kontrolu nezaraznih bolesti Instituta za javno zdravlje Srbije "Dr Milan Jovanović - Batut" u Beogradu kroz precizne i dobro sistematizovane tabelarne i grafičke prikaze daje epidemiološke parametre malignih neplazmi na teritoriji centralne Srbije.

Od brojnih afirmativnih utisaka, izdvajaju se dva osnovna.

Prvo, jasno prikazana statistika morbiditeta i mortaliteta od malignih bolesti, prihvatljiva za različite specijalnosti medicine izvan domena epidemiologije, ukazuje na visoko stručni i posvećeni rad grupe autora, na osnovu koga svi poslenici u onkologiji dobijaju čvrstu tačku oslonca za svoja dalja istraživanja u složenoj oblasti malignih bolesti.

Drugo, populacioni registar daje nacionalne koordinate za orijentisanje u oblasti onkologije upravo u periodu kada se u organizaciji Ministarstva zdravlja Republike Srbije razvijaju programi organizovane prevencije raka dojke, debelog creva i grlića materice u Srbiji i promovišu nacionalni vodiči dobre kliničke prakse dijagnostike i lečenja malignih bolesti navedenih lokalizacija, što obećava dobar sinergizam u razvoju onkologije zasnovane na dokazima i standardima.

Registar za rak će stoga sigurno biti često citiran izvor u kliničkim studijama u onkologiji, a autorima može da se poželi da od aktuelnog registra bude bolje samo njegovo naredno izdanje.

REVIEW

Cancer Registry of Central Serbia is the most important source of morbidity and mortality data for malignant diseases in our country. Designed as a population based registry, it provides relevant information considering incidence and mortality rates from cancer in Serbia and their trends. These parameters are crucial not only for monitoring on epidemiological situation regarding malignant diseases, but also for the evaluation of various preventive measures and programs implemented with the aim to prevent and reduce the burden of these diseases in our population, such as screening programs for specific malignant diseases.

Bearing in mind the extensive set of data regarding the nature of the disease, as well as respectable parameters of quality of these data, Cancer Registry in our country is extremely significant resource for medical practise, education and research. Data from the Registry are serving physicians of different specialties to broaden their knowledge about malignant diseases, their risk and prognostic factors, with the aim of early detection and optimal treatment choice.

Cancer Registry of Central Serbia data are also used in all aspects of education in epidemiology, oncology and other areas related to malignant diseases on medical universities in the country, ranging from undergraduate through specialist and subspecialist to doctoral studies. As a result, utility value of the registry has significantly increased and become a serious resource for different types of epidemiological and other studies, as documented in a large variety of publications, including a doctoral thesis.

Belgrade, 30.10.2013

Institute of Epidemiology,

University of Belgrade Faculty of Medicine

Prof. dr Tatjana Pekmezovic

Population based Cancer Registry is the oldest registry in Serbia and is invaluable for understanding the burden of malignant diseases, planning strategies for the prevention and control of cancer, monitoring the effectiveness of screening and other preventive programs, planning and organization of health care and epidemiological and clinical studies. Since 1998 Cancer Registry was accepted into the International (IACR) and the European Association of Cancer Registries (ENCR), which contributed to the promotion of Serbia as a country that keeps up with the developed countries.

Special emphasis should be placed on the quality of the Registry, which is the result of decentralized data collection (at the district level), active and passive surveillance, the use of multiple sources of information about patients and deaths from cancer, adequate IT support, improving the knowledge of health professionals and applied methodology of international associations (IARC and ENCR). Authors in genuine and systematic way display data about incidence and mortality of cancer. It is rarely seen that "less interesting" statistics is presented in such an interesting, extremely clear and responsive manner, making this publication useful not only for experts of preventive medicine, but also for clinicians and other non-medical experts. In addition, they successfully found a measure of the total volume of information with precise definitions acceptable to the general public.

Altogether, this publication deserves praise not only from the viewpoint of the material presented, but perhaps even more, in terms of the necessity of laying foundations for continuous monitoring of trends of incidence and mortality from cancer.

It is essential for the Serbian Ministry of Health to recognize the importance of the population based Registry and to support all activities which may contribute to its further improvement, could lead to the improvement of health policy and management, and thereby reduce the number of patients and deaths from cancer, prolongation of life in patients, improving their quality of life and the reduction or elimination of potential risk factors.

Prof. dr Sandra Sipetic-Grujicic

Cancer registry of central Serbia by the authors from Department for Prevention and Control of NCD of Institute of Public Health of Serbia "Dr Milan Jovanovic - Batut" gives the epidemiological parameters of malignant neoplasms in the territory of central Serbia, which are shown by precise and well systematized tables and graphics.

Of the numerous affirmative impressions, it is worth mentioning two of them.

First, the statistics of morbidity and mortality from malignant diseases is clearly shown, by comprehensive and acceptable way not only for epidemiologists but also for other different medical specialties. This is the result of a highly professional and dedicated work of the authors on the basis of which all employees in oncology can get a solid point of support for their further research in the complex field of malignant diseases.

Secondly, population cancer registry provides national coordinates for orientation in the field of oncology, which is especially important during the ongoing implementation of the projects organized by the Ministry of Health of the Republic of Serbia: the national screening programs of breast, colon and cervix cancer and the national guidelines for good clinical practice for diagnostics and treatment of three cancer localization listed above, which promises good synergism in the development of oncology based on evidence and standards.

Cancer Registry will certainly be frequently cited source in many articles in the field of clinical oncology, with best wishes to the authors that the only issue better than the current registry will be its next edition.

UVOD

Populacioni registar za rak osnovan je u Srbiji 1970. godine na osnovu Plana statističkih istraživanja od interesa za Republiku (Sl. glasnik SRS br. 32/69).

U cilju primene jedinstvene metodologije u vođenju Registra u svim teritorijalnim jedinicama bivše Jugoslavije, 1986. godine doneti su Uputstvo o načinu i postupku prijavljivanja lica obolelih od malignih neoplazmi (Sl. list SFRJ, br. 3/86) i Pravilnik o obrascu Registra i načinu njegovog vođenja, obrascu prijave i postupku prijavljivanja i odjavljivanja određenih bolesti (Sl. glasnik SRS, br. 42/86).

Neprecizno uputstvo, nedovoljna edukacija zdravstvenih radnika, kao i nedostatak informatičke podrške imali su za posledicu subregistraciju novootkrivenih slučajeva raka, kao i relativno loš kvalitet podataka na samoj prijavi. U periodu od 1986. do 1995. godine, broj obolelih slučajeva malignih tumora koji su prijavljeni Registru bio je približno isti ili čak i manji od broja umrlih od raka.

Polazeći od zakonske obaveze i uloge Registra (pre svega, za procenu opterećenosti društva rakom, donošenje programa primarne prevencije, planiranje onkološke zdravstvene zaštite, kao i za klinička i epidemiološka istraživanja), u toku 1996. godine pristupljeno je njegovoj reorganizaciji u skladu sa preporukama Internacionalne (International Agency for Research on Cancer - IACR) i Evropske (European Network of Cancer Registries – ENCR) asocijacije registara za rak.

Reorganizacija je obuhvatala:

- decentralizaciju (registri se vode na nivou okruga, a baza podataka za centralnu Srbiju se nalazi u Institutu za javno zdravlje Srbije),
- pored pasivnog i aktivni način prikupljanja podataka,
- nove izvore informacija,
- edukaciju zdravstvenih radnika,
- informatičku podršku i
- povratni sistem informacija.

Zahvaljujući uspešnoj reorganizaciji, u toku 1998. godine Registar za rak u centralnoj Srbiji je primljen u Internacionalu (IACR) i Evropsku asocijацију registara za rak (ENCR).

Posle navedenih aktivnosti i vremenskog perioda od nekoliko godina, koji je neophodan za stabilnost podataka, ostvareni su uslovi za izradu prvog izveštaja u decembru 2002. godine.

U registrima koji funkcionišu više decenija, zbog mnogobrojnih izvora podataka i potrebe za njihovom proverom i analizom, uobičajeni vremenski period za prikupljanje podataka iznosi dve godine nakon čega se publikuje izveštaj.

INTRODUCTION

The Population Register for Cancer was formed in Serbia in 1970, originated from the Plan of Statistical Research of Interest for the Republic (Official Gazette of the Republic of Serbia No. 32/69).

In 1986, aiming to apply a unified Register implementation methodology in all territorial units of Former Yugoslavia, the Guidelines On Ways And Procedures Of Reporting Persons With Malign Neoplasms (Official Gazette SFRY, No. 3/86) and the Regulation Book For The Register Form And The Method Of Updating, The Report Forms And Reporting And Cancelation Procedures For Certain Diseases (Official Gazette Gazette of the Republic of Serbia No. 42/86) were adopted.

Unprecise Guidelines, insufficient education of the medical personnel, as well as the lack of informatics support resulted in the subregistration of newly found cases of cancer, as well as a relatively poor quality of data on the report forms themselves. In the period of 1986 - 1995, the number of cases with malignant tumors reported to the Register was approximately the same or even lower compared to the number of cases deceased from cancer.

Starting from legal obligations and role of the Register, (foremost for the evaluation of the cancer burden on society, adoption of primary prevention programs, planning oncology health care, as well as clinical and epidemiological research), the reorganization of the Register began in 1996, in accordance with the recommendations of the International Agency for Research on Cancer - IACR, and European Network of Cancer Registries - ENCR.

The reorganization encompassed:

- Decentralization (registers are formed on the level of regions, while the main database for Central Serbia is located in the Institute of Public Health of Serbia),
- Apart from passive, active data collection,
- New sources of information,
- Education of medical personnel,
- Informatics support and
- Feedback system of information.

During 1998, due to a successful reorganization, the Cancer Register in Central Serbia was admitted into the International Agency for Research on Cancer (IACR) and European Network of Cancer Registries (ENCR).

Following the afore-mentioned activities and several years period necessary for achieving stability of the data, conditions were created for issuing the first Report in December 2002.

In Registers functioning over a period of several decades, due to numerous data sources and the need to check and analyze them, the usual time span for data collection is two years, after which the Report is published.

METOD

Registar za rak u centralnoj Srbiji obuhvata podatke o: ličnim karakteristikama obolelih/umrlih, mogućoj pojavi multiplog primarnog tumora, datumu utvrđivanja sadašnjeg oboljenja, načinu dijagnostike, karakteristikama tumora (primarna i sekundarna anatomska lokalizacija, histološki tip, stadijum), ishodu bolesti, kao i podatke o zdravstvenoj ustanovi koja je prijavila maligni tumor.

Izvori informacija o obolelim/umrlim od raka su podaci iz instituta za onkologiju, onkoloških dispanzera, onkoloških klinika, bolničkih i vanbolničkih zdravstvenih ustanova, patohistoloških/citoloških, hematoloških i drugih laboratorijskih prijava smrti, fondova zdravstvenog osiguranja i ciljanih istraživanja.

Informatičku podršku Registru pružio je programski paket CanReg4 (Department of Descriptive Epidemiology, IARC, Lyon, France, 2002).

U cilju obezbeđenja kvalitetnog prikupljanja, unosa, čuvanja, obrade i analize podataka u Registru, primenjena je metodologija međunarodnih asocijacija (IARC i ENCR) registara za rak.

Za analizu umiranja od malignih tumora u centralnoj Srbiji u 2010. godini, korišćeni su nepublikovani podaci Republičkog zavoda za statistiku. Izvor podataka o populaciji bila je procena stanovništva za 2010. godinu Republičkog zavoda za statistiku.

Maligni tumori su šifrirani prema Međunarodnoj klasifikaciji bolesti – deseta revizija, knjiga 1- (šifre C00-C96) i prema Međunarodnoj klasifikaciji onkoloških bolesti – treće izdanje (šifre 8000/3-9941/3) - International Classification of Diseases for Oncology – Third Edition, World Health Organization, 2000, Geneva. Registrum nisu obuhvaćeni tumori "in situ" (šifre D00-D09).

U izveštaju pored nestandardizovanih, prikazane su i standardizovane stope incidencije (tabele 6, 13, 19, 23) i mortaliteta (tabele 7, 16, 21, 24). Navedene stope standardizovane su metodom direktnе standardizacije, a kao standardna populacija korišćena je populacija sveta (ASR-W), Evrope (ASR-E) i trankova (ASR-TRUNC).

Učešće prijavljenih slučajeva malignih tumora koji su registrovani samo na osnovu prijave smrti prikazano je na tabeli 17.

METHOD

The Central Serbia Cancer Register includes the following data: personal characteristics of new cases/deceased, possible appearance of multiple primary tumors, date of determination of current illness, diagnostic methods, tumor characteristics (primary and secondary anatomy localization, histology type, stage), outcome of the disease, as well as data on the health institution reporting the malign tumor.

Information sources concerning new cancer cases/deceased cases are data from the oncology institutes, oncology dispensaries, oncology clinics, hospitals and out-patients health institutions, pahtohistology/cytology, hematology and other laboratories, death reports, health insurance funds and targeted research.

The Register is informatically supported by the CanReg4 program package (Department of Descriptive Epidemiology, IARC, Lyon, France, 2002).

With the aim of providing quality in collection, entry, keeping, processing and analysis of data in the Register, the methodology of international associations was applied (IARC | ENCR) for cancer registers.

Unpublished data of the Republic Statistics Institute were used for the analysis of death due to malign tumors in Central Serbia in 2010.

The source of data concerning the population was the 2010 estimate of the Republic Statistics Institute.

Malign tumors are coded according to the International Classification of Diseases - Tenth Revision, Volume 1(codes C00-C96) and according to the International Classification of Diseases for Oncology - Third Edition (codes 8000/3-9941/3), World Health Organization, 2000, Geneva. The Register does not include tumors "in situ" (codes D00-D09).

Apart from crude rates, the Report includes standardized incidence rates (tables 6, 13, 19, 23) and mortality rates (tables 7, 16, 21, 24). These rates were standardized by the method of direct standardization, with the World (ASR-W), European (ASR-E) or truncated (ASR-TRUNC) population as the standard population.

The percentage of new malign tumor cases registered only on the basis of death reports (table 17).

DEFINICIJE

Incidencija je broj novodijagnostikovanih slučajeva raka u definisanoj populaciji, prijavljenih registru u dатoj kalendarskoj godini.

Uzrasno specifična stopa incidencije je broj novoobolelih od raka u definisanoj uzrasnoj grupi (najčešće petogodišnji interval) na 100.000 stanovnika te uzrasne grupe.

Mortalitet je broj slučajeva umrlih od raka koji se javljaju u definisanoj populaciji tokom određenog vremenskog perioda.

Uzrasno specifična stopa mortaliteta je broj umrlih od raka u definisanoj uzrasnoj grupi (najčešće petogodišnji interval) na 100.000 stanovnika te uzrasne grupe.

Standardizovane stope incidencije i mortaliteta predstavljaju fiktivne vrednosti koje se dobijaju određenim tehničkim postupkom, uvođenjem standardne populacije, obično je to: populacija sveta (ASR-W), Evrope (ASR-E) ili tranka (ASR-TRUNC). Njima se prevazilaze razlike (najčešće po polu i uzrastu) koje postoje u različitim populacijama, tako da su pogodne za poređenja.

DEFINITIONS

Incidence is the number of newly diagnosed cancer cases in a defined population, reported to the Register in the given calendar year.

The age-specific incidence rate is the number of new cancer cases in a defined age-group (usually five-year interval) per 100 000 population of that age group.

Mortality is the number of cases deceased from cancer appearing in a defined population during a determined period of time.

The age-specific mortality rate is the number of deceased from cancer in a defined age-group (usually five-year interval) per 100 000 population of that age group.

Standardized incidence and mortality rates represent fictive values reached by a certain technique, introducing standard population: usually World (ASR-W), European (ASR-E) or truncated population (ASR-TRUNC). They are used to eliminate differences (mostly gender and age) existing in different populations and are, therefore, convenient for comparison.

U realizaciji ovog izveštaja učestvovali su zdravstveni radnici i saradnici:

- Instituta za javno zdravlje u Nišu i Kragujevcu***
- Zavoda za javno zdravlje na teritoriji centralne Srbije***
- Hospitalnog Registra za rak Instituta za onkologiju i radiologiju Srbije***
- Instituta kliničkog centra Srbije i kliničkog centra u Nišu***
- Kliničko– bolničkih centara u Beogradu i Kragujevcu***
- Instituta za zdravstvenu zaštitu majke i deteta „Dr Vukan Čupić“***
- Univerzitske dečije klinike u Beogradu***
- Ginekološko akušerske klinike „Narodni front“***
- Zdravstvenih centara***
- Specijalnih / opštih bolnica, i***
- Domova zdravlja na teritoriji centralne Srbije.***

Health experts and administrative staff from the following institutions participated in the realization of this Report:

- Institutes of Public Health of Nis and Kragujevac;***
- Institutes of Public Health on the territory of Central Serbia;***
- Hospital Cancer Register of the Oncology and Radiology Institute of Serbia;***
- Institutes of the Clinical Centre of Serbia and the Clinical Centre of Nis;***
- Clinical-Hospital Centres in Belgrade and Kragujevac;***
- Institute for Health Care of Mother and Child "Dr Vukan Čupić";***
- University Childrens' Clinic in Belgrade;***
- Gynaecology and Obstetrics Clinic "Narodni front";***
- Health Centres;***
- Special / General Hospitals and***
- Primary Health Centres on the territory of Central Serbia.***
